PROFESSIONAL PROFILE

Backend Engineer & DevOps with 2+ years of experience building high-availability architectures, ETL data pipelines, and infrastructure automation (IaC). Python and Docker specialist with a proven track record of cutting operational costs by 35%, boosting system performance, and delivering scalable microservices on AWS and GCP. Fluent in English, with hands-on experience presenting technical results to international stakeholders in a Google Partner project.

TECHNICAL SKILLS

Backend:	Python (Pandas, Flask, Scrapy, Selenium, Automation), PHP/Laravel, JavaScript
DevOps/Cloud:	Docker, Docker Compose, Terraform (IaC), CI/CD, AWS (EC2, S3), GCP (Cloud Run, BigQuery), Magalu Cloud
Data:	ETL Pipelines, Web Scraping (150+ scrapers), MongoDB, SQL (Performance Tuning), BigQuery
Other:	RESTful APIs, Microservices, Chatbots/Rasa, AI/ML, Real-Time Systems, High Concurrency

PROFESSIONAL EXPERIENCE

Backend Developer | DevOps | Data Analyst *Poder360*

Jun 2024 – Present
Brasília, DF — Brazil

- ▶ **Product Launch:** Architected and shipped an end-to-end real-time financial quotes system (Poder Mercado), driving a 23% increase in product engagement.
- ▶ **Cloud Migration:** Migrated infrastructure to Magalu Cloud using Terraform IaC, reducing monthly cloud costs by 35% and improving environment reliability.
- ▶ **High Availability:** Designed and maintained a real-time election coverage system guaranteeing 99.9% uptime under extreme traffic spikes.
- ▶ **Data Engineering:** Built and maintained a portfolio of 150+ scrapers and data automations with 98% collection success rate, powering core company products.
- ▶ **Real-Time Analytics:** Developed a real-time audience analytics bot serving 130+ newsroom users, improving editorial decision-making speed by 50%.
- ▶ **DevOps/CI-CD:** Optimized Docker-based deployment pipelines, cutting delivery time by 60% across hybrid AWS/GCP environments.
- ▶ **Tech Leadership:** Served as the team's Python technical reference, reducing tech debt by 20%; automated ticket triage, cutting response time by 40%.
- ▶ **Google Partner:** Led data processing for a Google Partner project (SIOP/National Treasury), delivering 30% faster data consolidation and presenting results to stakeholders.

Backend Developer (Internship) *Demander*

Dec 2023 – Apr 2024
Lajeado, RS — Brazil

- ▶ **Refactoring:** Refactored legacy PHP/Laravel codebase, eliminating 25% of critical bugs and improving long-term maintainability.
- ▶ **i18n:** Delivered full product internationalization (i18n) in 3 languages, expanding market reach.
- ▶ **Performance:** Optimized critical SQL queries, achieving a 35% performance gain on high-load database operations.

Backend Developer *LegalWtech*

Jul 2023 – Oct 2023
São Paulo, SP — Brazil

- ▶ **Automation:** Built a legal automation bot processing 500+ documents/day with high accuracy.
- ▶ **Chatbot/AI:** Deployed Rasa-powered chatbots, increasing automated service accuracy by 45%.
- ▶ **DevOps:** Provisioned Docker environment on AWS with 99.5% uptime for critical legal applications.

NOTABLE PROJECTS

BotEconomy | 2025

- ▶ Telegram bot for real-time financial analysis: automated alerts, charts, and PDF reports. Stack: Python, Pandas, Matplotlib, Docker.

Document Manager | 2025

- ▶ Full-stack web app with authentication, secure document upload and storage. Stack: Flask, MongoDB, Docker Compose.

EDUCATION

Associate's Degree in Systems Analysis and Development

Universidade Estácio de Sá

Nov 2024

CERTIFICATIONS

- | | |
|---|---|
| ▶ AWS Infrastructure as Code with Terraform | ▶ Python Complete (Basic to Advanced + RPA) |
| ▶ GCP AI Applications with Cloud Run | ▶ Terraform – Basic to Advanced |
| ▶ Advanced Docker | |
